Forecast for Friday 23 Jun 2023

Weather: A dry and bright start. However, cloud will be increasing from the west, which will bring outbreaks of rain, locally heavy at times, during the afternoon and evening.

Chance of cloud-free hill tops above 600m: 80% during the morning, deteriorating to 20% in the afternoon and evening.

Low Cloud and visibility: Low cloud with bases down to 500-600m at first, lowering to 300-400m in rain/drizzle during the afternoon and evening. Visibility will be generally good throughout, but reducing to moderate or poor at times, especially in rain/drizzle on the summits.

Meteorologist's View

Possibly slippery underfoot due to the wetter conditions. Therefore, suitable footwear is advised for spending any length of time walking or hiking on the hills.
